Press release, 1/30/2015

## Orica shows renewed trust in Prevas

**Orica is investing in a new production facility and is receiving help from Prevas. The order to Prevas includes among other things, development and installation of control systems for the new facility. The order is valued at SEK 6 million and commissioning is set for mid-2015.**

Orica Mining Services in Gyttorp, Sweden manufactures, develops and markets fuse material and bulk explosives for the mining and construction industries. To increase production capacity, Orica's global organization has decided to invest in a new production facility in Gyttorp. The new facility is being established on existing premises with Prevas as the collaborative partner for industrial IT.

Work with planning and design of the new facility has been underway for a longer period of time and in close collaboration between Orica and Prevas.

"Prevas' experience of production-related IT solutions in combination with our previous successful collaboration were behind our decision to continue working with Prevas," says Rickard Hallor, Procurement & Store Lead manager at Orica.

During planning Prevas has also been responsible for developing a quality system for data collection.

"Our job is to increase efficiency in our customers' manufacturing processes," says Matz Axelsson, business unit manager at Prevas. "We're celebrating our 30-year jubilee this year and our long experience in industrial IT enables us to offer solutions and services that match our customers' needs for increased competitiveness and quality-assured IT solutions. We're very happy with our expanded collaboration with Orica."
